

Metabolic Disorders & Vulnerability: a Public Health issue

Summer School 2023

22/09/2023

11H30

Keynote lecture

Integrating Human Telomere Biology with other Disease Risk Factors: New Perspectives

Dr. Elizabeth Blackburn

Nobel Prize in Physiology, 2009
(UC San Francisco)

Morning session

8H30

Opening remarks
G Derumeaux (IMRB U955, UPEC)

9H00

Diabetes: the current situation in France
S Hadjadj (Université de Nantes)

9H30

Diabetes, risk prediction and CVD
C Lang (University of Dundee, UK)

10H00

Modeling of metabolic pathologies
M Ibberson (SIB, Lausanne)

10H30

New statistical approaches
E Audureau (IMRB U955, UPEC)

11H00: Break

11H30

Keynote lecture

Afternoon session

13H30

Sleep, cardio-metabolic risk, social and economic determinants. JL Pépin (University of Grenoble)

14H00

Psychiatric pathologies and metabolic risk
O Godin (IMRB U955, UPEC)

14H30

Cardiovascular risk trajectories and inflammation
N Venteclef (University of Paris)

15H30

The patient's perspective
JF Gautier (University of Paris)

16H00: Break

16H15

Public policies for the prevention of obesity and diabetes
Maurice-Pierre Planel (Sciences Po, Paris)
